#### **About Siemens Digital Industries Software**

Siemens Digital Industries Software is a global leader in the growing field of product lifecycle management (PLM), manufacturing operations management (MOM), and electronic design automation (EDA) software, hardware, and services. Siemens works with more than 100,000 customers, leading the digitalization of their planning and manufacturing processes. At Siemens Digital Industries Software, we blur the boundaries between industry domains by integrating the virtual and physical, hardware and software, design and manufacturing worlds. With the rapid pace of innovation, digitalization is no longer tomorrow's idea. We take what the future promises tomorrow and make it real for our customers today. Where today meets tomorrow. Our culture encourages creativity, welcomes fresh thinking and focuses on growth, so our people, our business, and our customers can achieve their full potential.

## Chapter 1 ODB++ Viewer Installation

This document provides instructions for installing the ODB++ Viewer software on a supported operating system.

Running the Installer Performing a Silent Installation Installation Directory Structure Troubleshooting the ODB++ Viewer Installation

### **Running the Installer**

As you run the installation wizard, you must specify the location of the ODB++ Viewer directory.

#### **Restrictions and Limitations**

No special characters other than Underscore (\_) and Dash (-) are allowed in the installation path.

#### **Prerequisites**

Access to the latest installation package odb-plus-plus-viewer-64-bit.zip.

#### **Procedure**

- 1. Log in with administrator rights.
- 2. Close all open applications.
- 3. Extract the content of the ODB++ Viewer installation package to a local disk.
- 4. Within the extracted content, locate and run the installer executable:

ODB\_Viewer\_<ver>\_Windows\_64\_SA\_Setup.exe

5. Provide the information requested by the wizard:

#### **Results**

Refer to the *ODB++ Viewer User Guide* for instructions on how to interactively review ODB++D product models.

## **Performing a Silent Installation**

The ODB++ Viewer installation provides a Batch Tool that generates a script using the paths you provide. You can further customize the script for your site by adding a statement to set the VALOR\_DIR environment variable, and then run the script to install ODB++ Viewer on multiple computers.

**Tip** You can configure the Batch Tool as described in the Online Help for the tool.

#### **Prerequisites**

- The installer executable is stored in a repository accessible to all computers on which batch installations will be run.
- The Siemens Programs software is installed. If not, perform an interactive ODB++ Viewer installation as described in "Running the Installer" on page 5.

#### Procedure

- 1. Open the Batch Tool in one of these ways:
  - From the Windows Start menu, choose **Siemens > Batch Tool**.
  - From the Windows Start menu, choose **Siemens > Siemens Install**. On the opening page of the Siemens Install wizard, choose **Tools > Batch Tool**.
- 2. On the Welcome to the Batch Tool page, click **Next**.

🧔 Siemens Install	- • ×		
SIEMENS	ENS Welcome to the Batch Tool		
Batch Steps	This tool guides you through the process of creating an executable batch script that can be run on client machines to install products from a shared repository. Navigate through an easy step-by-step guide to creating a batch script.		
7.0-030 Windows 11.64	Back Next		

3. On the Repository Setup Overview page of the Batch Tool, click Next.

🥡 Siemens Install	– o ×		
SIEMENS	Part 1 of 2: Repository Setup Overview 🕜		
Batch Steps	In this first part, you define the network paths to the repository. (Installation Source)		
Welcome	NOTE: Before continuing, download or copy the CD contents to the repository location.		
► Part 1	Part 1: Repository Setup • Select the path to setup exe or install.* at the repository location.		
▶ Installer	Select the path to source at the repository location.		
▶ Source	Part 2: Client Batch Script Creation		
▶ Part 2	- Target path(s) on client.		
	- Products to install.		
	<ul> <li>Options (License Agreement, Silent mode, Verification).</li> </ul>		
7.0-030 Windows 11 64	Back Next		

4. On the Siemens Install Program page, browse to the installer executable and click Next.

**Note:** In the screenshots, the ODB++ Viewer version number is represented as "<*ver*>".

5. On the Source Location page, click **Next**.

🥡 Siemens Install	– o ×
SIEMENS	Source Location  ?
Batch Steps	Specify the source at the repository location. Path to the source:
Welcone     Part 1	C:\silent_installODB_Viewer_ever>_Windows_64_SA_Setup.exe Search
▶ Installer	Available products: Release Name: ODB Viewer <ver></ver>
Source	Date: Mar 05, 2024 Description: ODB Viewer <ver></ver>
▶ Pat2	Products:
	APP <sup>-</sup> 2 74 64 8
7.0-030 Windows 11 64	Back Next

6. On the Client Batch Script Overview page, click Next.

Siemens Install	– o x	
SIEMENS Part 2 of 2: Client Batch Script Overv		
Batch Steps	In this last part, you create the batch script that will run on the client machines. This script installs the software from the reno illow you just set up in Part 1.	
▶ Part 2	Part 1: Repository Setup	
Tanal	<ul> <li>Select the path to setup,exe or install," at the repository location.</li> </ul>	
- 10 per	<ul> <li>Select the path to source at the repository location.</li> </ul>	
Selection		
FILA	Part 2: Client Batch Script Creation	
	Target path(s) on client.	
Options	Products to install.	
► Save	Options (License Agreement, Silent mode, Verification).	
<ul> <li>Enisted</li> </ul>		
7.0-030 Windows 11 64	Back Next	

 On the Default Target Location page, specify the location where ODB++ Viewer software will be installed on the target computers, and click **Next**. This can be changed when the installation is performed.

Siemens Install	- • ×	
SIEMENS	Default Target Location	
Batch Steps	Specify a default target location where products are installed on the client machines.	
▶ Part 2	Path to default target location used on all client machines:	
▶ Target	C:MentorGraphicsIODB++_Viewer Browse	
Selection		
F EULA	NOTE: The default target can be overwritten when executing the script.	
Options		
▶ Save		
▶ Finished		
7.0-030 Windows 11 64	Back Next	

If the directory does not exist, executing the batch script creates the directory before loading the software to that location.

You can override this location when executing the batch script, by using the -tgt flag.

8. On the Product Selection page, select ODB++\_Viewer and click **Next**.

i Siemens Install		– o ×
SIEMENS		Product Selection 🕜

7.0-030 Windows 11.04		<u>B</u> ack <u>N</u> ext

9. On the License Agreement Viewing Preference page, select the option "Agree now" and click Next.

10. On the License Agreement page, click Agree.

- 11. On the **Options** tab of the Batch Script Options page, specify optional script behavior and click **Next**.
  - **Verbose mode** Controls whether the batch script will display detailed progress during product installation.
  - Verify installation (takes extra time) Not relevant to the stand-alone ODB++ Viewer installation.
  - **Copy log file to location** Controls whether the log files from each installation will be written to a central location, so that the status of each installation can be monitored centrally. The computers must all be able to access this location. If this option is selected, the repository directory is used for log file storage by default.

- 12. On the Confirm and Save page, check the information that you have selected, save the batch script, and click **Save**.
  - Selected products Check that the script will be created using the appropriate information.
  - Save batch script to Select a directory and name for the batch script.

🏟 Siemens Install	– o ×
SIEMENS	Confirm and Save 😯
Batch Steps	Selected Products:
▶ Pari 2	Platform: Windows 64-bit Release: ODB Viewer <ver> Products:</ver>
Selection	ODB_Viewer
► EULA	
Options	
Save	
▶ Finisted	
	Installer: C:(silent_installODB_Viewer_sver_sWindows_64_SA_Setup.exe Source: C:(silent_install/ODB_Viewer_sver_sWindows_64_SA_Setup.exe Target: C:(MentorGraphics)ODB++_Viewer
	NOTE: Target can be overwritten with the "-tgt (new target)" argument to the batch script
	Save batch script to:
	C:silent_install/batchInstall.BAT
1.0-030 Windows 11 64	Back Save

13. On the Finished page, check the information and click **Done**.

- 14. Browse to the batch file you have created and open it in a text editor.
- 15. In the PRE INSTALL section, add a statements to set the VALOR\_DIR environment variable. See "Installation Directory Structure" on page 22.

For example:

SET VALOR\_DIR=C:\MentorGraphics\ODB++\_Viewer\odbviewer\_dir

16. Run the batch file as Administrator to install ODB++ Viewer on the computers that require the ability to review ODB++ data.

#### Results

Non-critical warnings are suppressed during a batch installation. After installation completes, you can view warnings in the file *<ID>mip\_history.txt*. The default location for this file is *C:\MentorGraphics\Install \LOGS*.

#### Examples

The following is an example of a batch file with the ODB++ Viewer parameters:

```

## **Installation Directory Structure**

The ODB++ Viewer installation results in files stored in several directories.

• **ODB++ Viewer Installation Directory** — The location where ODB++ Viewer Application Directories for each version are installed.

Default path:

C:\MentorGraphics\Valor

• **ODB++ Viewer Application Directory** — Contains ODB++ Viewer executables and other installed files, and cannot be altered by the user. The directory naming is version-specific.

Default path used by interactive installation:

<ODB++ Viewer Installation Directory>\ODB++\_Viewer\odbviewer\_<ver>

The environment variable VALOR\_EDIR points to the *edir* subdirectory under the ODB++ Viewer Application Directory.

The file %VALOR\_EDIR%\env\_file contains Valor environment variables set during installation. The settings defined in this file are not overwritten during an upgrade.

Valor System Directory (VALOR\_DIR) — Contains system, configuration, and work files. This
directory can be installed locally or in a remote location accessible for reading and writing by all
users.

The environment variable VALOR\_DIR points to this location.

Default path used by interactive installation:

<ODB++ Viewer Installation Directory>\ODB++\_Viewer\odbviewer\_dir

 Valor Home Directory (VALOR\_HOME) — Once the user starts working with ODB++ Viewer, a directory named .genesis is created under VALOR\_HOME to store user-level configuration files.

The environment variable VALOR\_HOME points to this location.

Default path used by interactive installation:

<ODB++ Viewer Installation Directory>\ODB++\_Viewer\odbviewer\_dir

 Valor Temporary Directory (VALOR\_TMP) — The directory where the system creates volatile, temporary files.

The environment variable VALOR\_TMP points to this location.

Default path used by interactive installation:

<ODB++ Viewer Installation Directory>\ODB++\_Viewer\odbviewer\_dir\tmp

# Troubleshooting the ODB++ Viewer Installation

These issues might be encountered during or after ODB++ Viewer installation.

Issue	Explanation
TCP/IP errors in stand-alone mode	ODB++ Viewer requires that TCP/IP be installed even on stand-alone computers. Make sure that TCP/IP networking is installed, and that there is a network adapter for TCP/IP.
	<ul> <li>If TCP/IP is not installed, install it.</li> </ul>
	<ul> <li>If no network adapter is installed, install one.</li> </ul>
	• If the computer has no network card, install MS Loopback adapter.
File Not Found when loading the system	If the system does not load, check that the QT shared library file is available at the appropriate location:
	%VALOR_EDIR%\nv\deps\valor_qt_514
Sort and find commands fail when run from scripts	The sort and find commands are built into Windows in /winnt/system32. If they fail, perform one of these actions:
	<ul> <li>Put the string %VALOR_EDIR%\nv\bin in your path before \winnt\system32</li> </ul>
	<ul> <li>Alias sort to %VALOR_EDIR%\nv\bin\sort in startup scripts.</li> </ul>
	Alias find to %VALOR_EDIR%\nv\bin\find in startup scripts.
